@ifcpc26

Presentation of the french organizing society of IFCPC 2026

The French Society of Colposcopy and Cervico-Vaginal Pathology (SFCPCV) is proud to host the IFCPC 2026 for its XIX edition!

The SFCPCV was born in France in 1977 at the instigation of Fernand COUPEZ. Its goal is to bring together gynecologists and pathologists interested in cervical pathology and colposcopy with a view to cancer prevention within a subspecialty of cervicovaginal pathology. It has regional branches in most French regions.

The Society has given itself the task of participating in the teaching of this subspecialty through courses carried out in the various branches, and in continuing medical training through its annual days and those organized in the regions. Its experts participate in the development of programs and the teaching of initial university training in cervicovaginal pathology.

Internationally, the Society is affiliated with the International Federation of Colposcopy and Cervical Pathology (IFICPC) and the European Federation of Colposcopy (EFC). The Society's experts participate in the international activities of these Federations. Furthermore, the French Society regularly invites delegates from foreign Societies to its Congress and delegates from the French Society are invited to the congresses of many foreign societies.

A word from both presidents : the president of the local committee and IFCPC president

Dear Sponsors and Exhibitors,

The International Federation of Cervical Pathology and Colposcopy (IFCPC) invites you to participate in the XIX IFCPC World Congress, to be held in Paris - Versailles, France, from June 4th to 6th, 2026.

This will be an opportunity to share the most recent scientific data on the prevention of cervical cancer and HPV (human papillomavirus)-induced lesions in the lower genital tract. Key topics include:

- How to implement effective vaccination and evaluate the results.
- How to improve screening methods (the role of visual methods, cytology, HPV testing, genotyping, double immunostaining (CINtec), and methylation).
- What information should we provide to patients, and what are the psychological consequences of these virological tests?
- How to manage low-grade lesions, CIN2.
- How to improve the quality criteria of colposcopic examinations, and which classification to use.
- Management of immunocompromised patients and HPV during pregnancy.
- Post-therapeutic follow-up and the management of multifocal lesions (vaginal, vulvar, anal).

All of these topics will be discussed by the best experts from the five continents, allowing us to compare our experiences and improve our practices.

In the magnificent setting of the Versailles Palais des Congrès, we will exchange and share the latest scientific news over three days during a high-quality international program in a friendly and collegial environment.

Pr Xavier CARCOPINO
SFCPCV President, France

Dr Jean-Luc MERGUI
IFCPC President, France

Why should your organisation participate in the IFCPC 2026 World Congress?

Benefit from worldwide exposure

Promote your brand on an international stage with 1,000 global leaders in women's health

Establish relationships

Connect face to face with leading experts across research, practice and technology.

Brand alliance : Align your brand with cutting-edge research and development and demonstrate your organisation's commitment to women's health and rights.

Reach for the future :

The IFCPC World Congress is the ideal platform to showcase your latest products to a focused audience and influence the future of obstetrics and gynaecology.

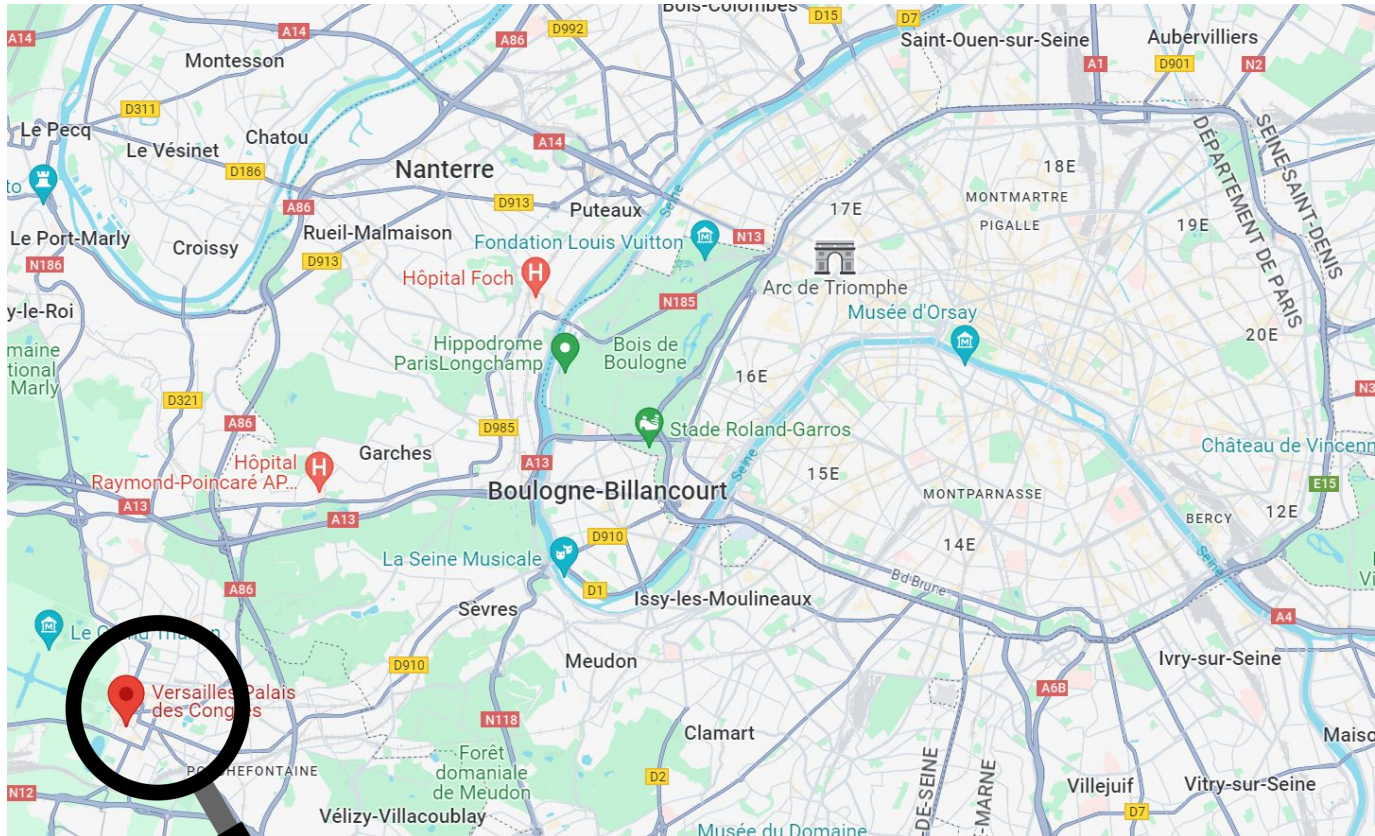

Organisations that have previously supported the IFCPC World Congress include:

- Pharmaceutical
- Equipment and medical devices
- Ultrasound and imaging
- Academic and research
- Media and publishers
- Insurance providers
- Laboratories
- Non-profit organisations and associations
